# CERTIFIED PROVIDERS OF INFORMATION TECHNOLOGY (IT) PRODUCTS, SERVICES AND TRAINING

The National Information Technology Authority, Uganda (NITA-U), was established under the National Information Technology Authority, Uganda Act, 2009 and among the Authority's functions is the certification of providers of information technology (IT) products, services and training in Uganda.

NITA-U implements this Certification function in accordance with the National Information Technology Authority, Uganda (Certification of Providers of Information Technology Products and Services) Regulations, 2016 as amended in 2018, as well as the National Information Technology Authority, Uganda (Authentication of Information Technology Training) Regulations, 2016.

The Covid- 19 pandemic has accelerated digitalisation of many

businesses and services. The new normal has propelled us into a digital drive and the demand for IT services and products is on the rise. As a regulator for the IT sector, we enforce standards for the IT industry. We aim to protect and promote the interests of consumers or users of information technology services.

**Why you should engage a Certified Provider of IT Services, Products and Training**

- Assurance as to the quality of IT Products and Services.
- Enhanced Consumer Protection and Satisfaction.
- Independently audited Providers of IT Products and Service demonstrate commitment to quality and continual improvement.

**Why you should certify your Company as an IT Service Provider**

- Improve your corporate image and credibility.
- Competitive advantage which facilitates access to diverse markets.
- Its proof that your company has the competence to comply with best practice.
- Improved quality of IT Products and Services offered.

**Benefits of IT Certification to the Sector and Country at large**

- Regulation of the IT sector to ensure that only companies and professionals that meet laid down requirements are certified to offer IT products and services to government and the public;
- Increased consumption of local IT Services in preference for off-shore IT Services in line with the Buy Uganda Build Uganda

(BUBU) policy;

- Promotion of the development of local IT solutions (conforming to international standards and best practice) which has a potential to reduce the cost of IT products and services to consumers;
- Increasing competitiveness of IT Products and Services within the country and globally

We encourage all consumers of IT Products, Services and Training to ensure that they procure from providers duly certified or authenticated by NITA-U.

For more details on the underlisted certified providers, please visit: [www.nita.go.ug](http://www.nita.go.ug).
